

Do Now 6.01 ## In your Console ### Type the following code ```python my_dictionary = { 'cat': 'a domestic feline', 'dog': 'a domestic canine', 'chair': 'furniture piece for sitting', 'car': 'automobile' } print(my_dictionary) print(my_dictionary['dog']) print(my_dictionary.get('dog')) print('cat' in my_dictionary) print('monkey' in my_dictionary) ``` ## In your Notebook ### Respond to the following 1. Write down what was printed out. What type is `my_dictionary`? 2. Add a line of code that will print the definition of `chair`, then run the code again. 3. Write down what happens if you use `my_dictionary['kittens']`? What do you think that error means?
