

# Do Now 6.04 ## 1. In your Console ### Type the following ``python my\_dictionary = { 'a': 1, 'b': 2, 'c': 3, 'd': 4, 'e': 5 } print(list(my\_dictionary)) `` ## In your Notebook ### Respond to the following 1. Write down what `list()` does when given a dictionary. 2. What type does `list()` return? 3. Write down how you might use a `for` loop to go through and print the values of `my\_dictionary`. ## 2. In your Console ### Challenge yourself Try your solution to 3.
