

# Do Now 4.03 ## Type in your Console ```python def print\_6\_stars(): my\_string = " for i in range(0, 6):  
my\_string += ' '\*print(my\_string) ``` ## In your Notebook 1. Write down what the output of the function  
`print\_6\_stars` is. 2. Write a function `print\_star\_square` that calls `print\_6\_stars` in a loop to produce the  
following output. ```python >>>python3 print\_stars.py \*  
\* \* \* \* \* ``` 3. Rewrite the function `print\_star\_square` without using `print\_6\_stars`. \* Note that there are two  
ways to get the above output, so just try doing both!
