

Do Now 7.02 ## In your Console ### Type the following ``python class Pet: def __init__(self, name): self.name = name my_pet = Pet('Peter') print(my_pet.name) `` ## In your Notebook ### Respond to the following 1. What is the purpose of the `__init__` method? 2. What if you wanted to initialize all pet objects with a name and a color? 3. How would you modify the code to create a pet object with a name of "Peter" and a color of "brown"?
