Do Now 1.03 Open and save a new project called `DoNow103` in the IDE. Run a program by clicking the ">" Run button. See the instructions below for how to open, save, and run a file in the online IDE. Practice typing the following expressions in the editor and running the code. ## Expression 1 `2 * 3 * 5` ### Expression 2 `"abc"` ### Expression 3 `"abc" + "bde"` ## Now try typing the statement below into the file. Save and run the code ```python print(2*3*5) ``` Write down the result. Explain what `print` does. Try printing out 3 different values. ## SNAP Flashback – Print Command ![Snap! Print Command](Untitled.png) ## How to open, save, and run a file 1. Open a Python 3 project: ![Open a project](trinket_new.png) 2. Repl.it autosaves projects 3. Run the program ![Run Python 3](donow103_run.png)
